

comprising at least one dispensing opening through which the container contents is removable, a movable lid which is movably attached to said stationary cover, or is an integral movable part of the stationary cover, so as to reversibly close said dispensing opening, the container being characterized in that a gas-proof means is located between said stationary cover and said movable lid, for providing a gas-tight barrier between the inside and the outside of the container when the movable lid is in the closed position, wherein the gas proof means comprises a gasket seal.

Please amend claim 1 to read as follows:

- B1*
1. A container for wetted wipes, comprising a container body, a stationary cover being removably fitted on, or integrated to said container body, said stationary cover comprising at least one dispensing opening through which the container contents is removable, a movable lid which is movably attached to said stationary cover, or is an integral movable part of the stationary cover, so as to reversibly close said dispensing opening, the container being characterized in that a gas-proof means is located between said stationary cover and said movable lid, for providing a gas-tight barrier between the inside and the outside of the container when the movable lid is in the closed position, wherein the gas proof means comprises a gasket seal.

Please amend claim 5 to read as follows:

- B2*
5. A container according to claim 1, wherein a push-button is an elastically deformable portion of the stationary cover, said push-button being located near enough to protrusions of the stationary cover and the movable lid, to disengage said protrusion of the movable lid from said protrusion of the stationary cover when said push-button is pressed, thus releasing the movable lid into the open position.

Please amend claim 6 to read as follows:

- B3*
6. A container according to claim 1, further comprising a spring element, wherein the spring element is a metallic single or multiple winding coil spring with elongated ends.

Please amend claim 8 to read as follows:

- NCX BY*
8. A container according to any of the preceding claims, wherein the gas-proof [gas-tight] means is a gasket seal which is located along the periphery of the dispensing opening.

Attached hereto is a marked-up version of the changes made to the claims by the current amendment. The attached page is captioned "Version with markings to show changes made".
